POOL BLANKETS & ROLLERS

Save Water.
Save Heat.
Save \$\$\$.

- Cuts evaporative water loss by over 90%
- Keeps your pool water cleaner
- Raises your pool's temperature
- Saves you money on chemicals, maintenance and heating

How Your Pool Blanket Heats Your Pool

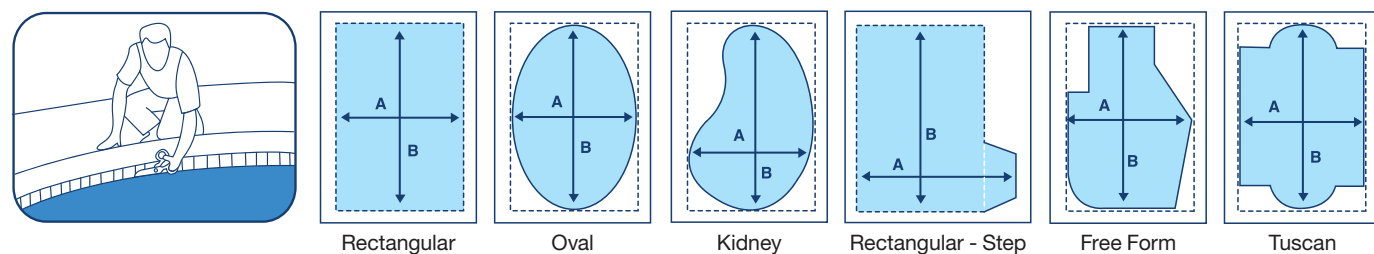

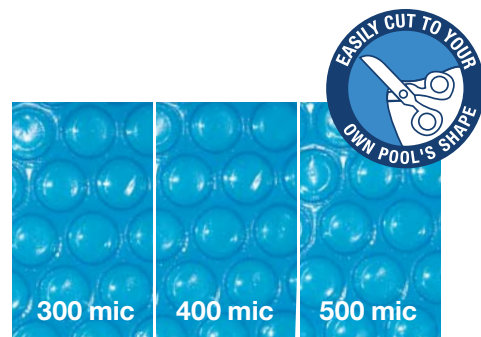

Autumn Solar **Sunwise** Pool Blankets use the sun's energy to heat your pool, raise its temperature and extend your swimming season substantially. **Sunwise** Pool Blankets are crafted from thousands of tough, puncture resistant air cells encased in a rugged, new generation poly material, LLDPE. This provides twice the stretchability and strength of conventional LLDPE films. **Sunwise** blankets simply float on your pool's surface, held in place by the suction created by the air cells.

Our LLDPE material is designed for heat retention and allows optimum passage of the sun's rays. Solar energy passes easily through the translucent material and is stored within the air pockets/bubbles of your **Sunwise** blanket. The **Sunwise** pool blanket material is a great conductor of heat so it quickly transfers the absorbed heat to your pool's water. This way, precious solar energy is not wasted through heating up and cooling down periods.

Measuring & Installation

Measure the length and width of your pool at water level. For step areas measure like the diagrams shown below. Your pool blanket can then be welded into one piece.

To install your blanket simply place the rectangle over your pool and trim to shape with scissors. Follow the outline of your pool and leave approx. 75mm up the edge. Extra material will be included on all blankets.

Sunwise Pool Blankets

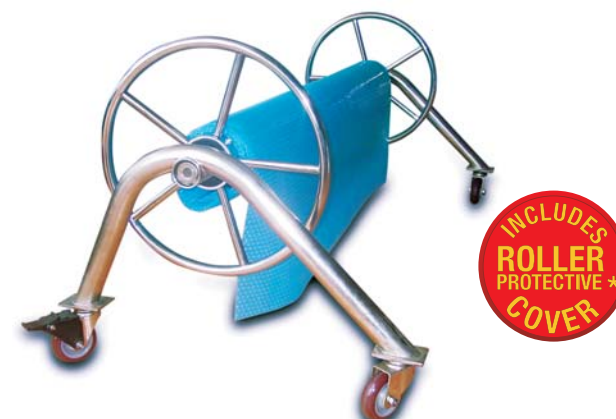

- **Warm pool water**
Sunwise pool blankets act as a solar heater absorbing the sun's energy during the daylight hours while acting as an insulator to prevent heat loss at night when temperatures fall. Your pool temperature can be raised by up to 8 degrees.
- **Cuts heating costs**
Pool blankets can prevent over 95% of evaporative heat loss saving lots of water and keeping energy bills low during the summer.
- **Maintains pool cleanliness**
Sunwise pool blankets can save you many hours spent cleaning your pool. They prevent leaves, dust and debris entering your pool.
- **Reduces chemical cost and usage**
By minimising evaporative water loss, your pool blanket helps stabilise your pool's chemical balance saving you time and money.
- **Extends your swimming season.**
By raising your pool temperature you can enjoy your pool for more months throughout the year and extend your swimming times into the evening hours.

Pool Blanket Rollers

Using a Pool Blanket Roller makes removing your pool blanket easy. Whether your pool is large or small our specially designed, economical, trouble free and lightweight roller systems are perfect for handling and also storing your pool blanket when it is not in use. They can be operated easily by a single adult and are the perfect quality accessory for your pool.

- Top quality fabrication
- Available for any pool type and budget
- Anti friction operation
- Adjustable sizes
- Nylon brushes
- Easy to manoeuvre
- All rollers for inground pools come with wheels.

Commercial Roller

- 316 stainless steel
- 4 x heavy duty castors with brakes fitted
- 2 x stainless steel glide wheels
